- A comprehensive volume on Zurich housing construction is an anthology of over 100 individual buildings, ensembles and settlements

Housing of exceptional quality has been developed in the greater Zurich area since the mid-1990s. Public funding, the high standard of the competition culture and a vibrant architectural scene has resulted in a rich field of experimentation for good residential architecture. The approximately 500-page volume on Zurich housing construction is an anthology of over 100 individual buildings, ensembles and settlements developed over a period of 20 years. It is an impressive representation of an intense, blossoming housing development culture that has also attracted international attention. Text in English and German.
